Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with “Our Business”, “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 98, 151 and 186 respectively of this DRHP, as well as the other financial and statistical information contained in this DRHP. In making an investment decision, prospective investors must rely on their own examination of us and our business and the terms of the Issue including the merits and risks involved. Potential investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section.

This DRHP also contains certain forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this DRHP. We have, in this DRHP, included various operational and financial performance indicators, some of which may not be derived from our Restated Financial Statements and may not have been subjected to an audit or review by our Statutory Auditors. The manner in which such operational and financial performance indicators are calculated and presented, and the assumptions and estimates used in such calculation, may vary from that used by other companies in same business as of our Company in India and other jurisdictions. Investors are accordingly cautioned against placing undue reliance on such information in making an investment decision and should consult their own advisors and evaluate such information in the context of the Restated Financial Statements and other information relating to our business and operations included in this DRHP.

Materiality

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively; and*
- *Some events may not be material at present but may have a material impact in future.*

The financial and other related implications of risks concerned, whether quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

In this section, unless the context requires otherwise, any reference to "we", "us" or "our" refers to Kabra Jewels Limited.

INTERNAL RISK FACTORS

1. Our Company, Promoters and Directors are involved in certain legal proceedings. Any adverse outcome on such proceeding may affect our business, financial condition and reputation.

There are outstanding legal proceeding against our Company, Directors and Promoters, which are pending at various levels of adjudication before various courts, tribunals and other authorities. The summary of outstanding matters set out below includes details of the above proceedings.

**Our Promoters are also the directors of the Company. Hence litigations against them have not been included under the heading of director to avoid repetition.*

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “*Outstanding Litigations and Material Developments*” beginning on page 196 of this Draft Red Herring Prospectus.

2. Our Company requires significant amount of working capital for continued growth. Our inability to meet our working capital requirements, on commercially acceptable terms, may have an adverse impact on our business, financial condition and results of operations.

As on July 31, 2024, our Company had total sanctioned limit of Rs. 3,950 lakhs towards working capital facilities. For further details on our working capital facilities, see “Statement of Financial Indebtedness” on page 181 of this Draft Red Herring Prospectus. Our business requires substantial amount of working capital to maintain adequate inventory levels at our 6 (six) showrooms. In addition to the requirement of funds as provided in “Objects of the Issue – To Meet working capital requirements” on page 71 we may need to obtain additional financing in the normal course of business from time to time as we expand our operations. We may not be successful in obtaining additional funds in a timely manner and/or on favourable terms including rate of interest, primary security cover, collateral security, terms of repayment, or at all. If we do not have access to additional capital, we may be required to delay, scale back or abandon some or all of our plans or growth strategies or reduce capital expenditures and the size of our operations may get constrained. Moreover, if we raise additional debt, our interest expense will increase and our debt covenants under our existing loans may be impacted. If we raise additional funds through the issuance of equity, your ownership interest in our Company will be diluted.

We have in the past, and we may even in the future, continue to rely on personal guarantees and securities from our Promoters and members of Promoter Group for certain financing arrangements entered into by us. There can be no assurance that in the future we will continue to receive financial support from our Promoters and members of Promoter Group or be able to secure alternative sources of financing.

Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Further, our indebtedness means that a material portion of our expected cash flow may be required to be apportioned towards payment of interest on our indebtedness, thereby reducing the funds available to us for use in our business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations.

3. If we are unable to effectively manage our retail network and operations or pursue our growth strategy, we may not achieve our expected levels of profitability which may adversely affect our business prospects, financial condition and results of operations.

We believe that the key to a successful business and building a brand is to reach out to newer customers, understand their requirements and deliver them the best of the products. Considering the above, our main strategy is to manage our retail network efficiently. However, if we fail to implement our growth strategy and manage our retail network effectively, we may not achieve our expected levels of profitability which may adversely affect our business prospects, financial condition and results of operations. Below is the showroom wise sales break – up of our products for the last three financial years:

(Rs. In Lakhs)				
Sr. No.	Name of the Showroom	FY 2024	FY 2023	FY 2022

2.	KK Jewels Gold	3,551.51	-	-

Total		16,400.17	12,227.07	11,208.04

*The showroom has been non-operational since April 01, 2024.

4. We do not own the registered office and showrooms from which we carry out our business activities. Any dispute in relation to use of these premises would have a material adverse effect on our business and results of operations.

All our existing showrooms and offices in which we operate are obtained by us on rent. Additionally, our showroom called as KK Jewels Silver Studio, located at Unit No. 104, "ONE 42", Off Bopal Ambli Road, Opp Ashok Vatika, Bodakdev, Ahmedabad, Gujarat - 380054, India is not officially registered because the property is shared with another tenant who is unwilling to register the agreement. Further in the event of non-renewal of this

rent or lease and license agreements as the case may be, our operations and profitability may be adversely affected. We cannot assure you that we will be able to continue the above arrangement on commercially favorable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for our offices, showrooms and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favorable terms.

If we are required to relocate our business operations during this period or in the event of inability or delay in relocating offices, showrooms and other infrastructure to the proposed new location, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition. For details on the duration of existing rent agreements for our showrooms and offices, please refer to Chapter titled "Our Business" beginning on page 98 of this Draft Red Herring Prospectus. Further we confirm that there are no conflict of interest between the lessor of the immovable properties (crucial for operations of the company) and the company, Promoter, Promoter Group, Key Managerial Personnel and Directors.

- 5. *We have not entered into any agreements with our vendors and job workers (Karigars). Thus, any dispute or delay in getting the work done from the vendor and jobworkers could have a material adverse effect on our business, results of operations and financial condition.***

We design our products based on customer needs and have established arrangements with various vendors and job workers who manufacture products on our behalf using our design. Further, we have not entered into any agreements with our vendors and the job workers. In the past three financial years, we have not had any disputes with any karigars. Thus, any dispute or delay in future in getting the work done from the job workers could result into inventory mismanagement which could have a material adverse effect on our business, results of operations and financial condition.

- 6. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for, which may have an adverse effect on our business, financial condition and thereby on our results of operations.***

We may encounter predicaments in executing the orders placed by our customer or executing it on a timely basis. Moreover, there are factors which may be beyond our control or in the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, which may result in the postponement of executing or delivering of the necessary product(s) or cause its cancellation. Further, even though we execute orders as placed by our customers, the order could be cancelled or there could be any changes in delivery of the products. We rely significantly on our vendors and job workers for the manufacturing of our products. There is a risk that these vendors and job workers may prioritize other clients over us, potentially causing delays in the execution of our orders. Such delays could adversely affect our business operations and financial performance. Accordingly, it is difficult to predict with certainty if, when and to what extent the delivery of the orders placed will be made. Failure to deliver our orders on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our revenue, cost of operation and thereby our business functioning.

- 7. *Our gold and jewellery business faces risks from market volatility and changing consumer preferences. Fluctuations in commodity prices like gold could impact our costs and profitability. Evolving consumer tastes influence product demand, necessitating continuous adaptation to remain competitive.***

Our gold and jewellery business face heightened risk due to market volatility and shifting consumer preferences, compounded by the current record-high gold rates that may continue to rise. Fluctuations in commodity prices, especially in gold, directly impacts our cost of goods sold and overall profitability. The current peak in gold prices presents a particular challenge, as further increases could escalate our COGS costs, potentially squeezing profit margins unless we adapt our pricing strategies accordingly. Conversely, sudden declines in gold prices could impact inventory valuation and profitability, especially if we have materials acquired at higher costs.

In addition to market volatility, evolving consumer tastes and preferences in jewellery design pose ongoing challenges. Consumer preferences can swiftly change in response to fashion trends, cultural influences, and aesthetic shifts. Our success in the market hinges on our ability to anticipate and respond effectively to these changes, offering products that resonate with current consumer demands. Failure to do so could result in excess inventory, reduced sales, and decreased market relevance over time.

Given the current peak in gold rates and the unpredictability of consumer preferences, our business must remain adaptable and agile to navigate these risks successfully. It is essential to closely monitor market conditions, adjust pricing strategies accordingly, and continuously innovate to ensure our products remain appealing and competitive in the dynamic jewellery industry landscape.

8. *Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations.*

Our industry has seasonal increases and decreases in revenues and profitability, corresponding with weddings and festivals. Our sales have historically exhibited certain seasonal fluctuations, reflecting higher sales volumes on festivals and other occasions such as Dusshera, Akshay Tritiya, Dhanteras, Diwali etc. which occur in the third and fourth quarter of the fiscal year. This period also coincides with the wedding season in India. While we stock certain inventory to account for this seasonality, our fixed costs such as lease rentals, employee salaries, showroom operating costs and logistics-related expenses, which form a significant portion of operating costs, are relatively constant throughout the year. Consequently, lower than expected net sales during the third or fourth quarters of the financial year or more pronounced seasonal variations in sales in the future could have a disproportionate impact on our operating results for the fiscal year, or could strain our resources and impair our cash flows. Any slowdown in demand for our jewellery during peak seasons or failure by us to accurately anticipate and prepare for such seasonal fluctuations could have a material adverse effect on our business, financial condition and results of operations.

9. *Our Jewellery business is dependent on factors affecting consumer spending habit that are out of our control.*

Jewellery purchases are discretionary and are often considered as luxury purchase. Consequently, our business is sensitive to a number of factors that influence consumer spending habit which includes general economic conditions, consumer confidence in future economic conditions, recession and fears of recession, consumer debt, unstable consumer income, conditions in the housing market, interest rates, inflation. Any fall in demand or a decline in the consumer spending habit on jewellery could adversely affect our business, financial condition and results of operations.

10. *If we fail to anticipate, identify or react appropriately or in a timely manner to the changing trends in the jewellery industry, we could experience reduced consumer acceptance of our products, a diminished brand image, higher markdowns and costs to recast overstocked jewellery.*

Our success depends on the ability of our design team to identify, originate and define product and market trends, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. We cannot assure you that we can consistently keep up with industry trends. If we fail to anticipate, identify or react appropriately or in a timely manner to customer buying decisions, we could experience reduced consumer acceptance of our products, a diminished brand image, higher markdowns and costs to recast overstocked jewellery. These factors could result in lower selling prices and sales volumes for our products, which could adversely affect our financial condition and results of operations.

11. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our business operations require us to maintain large amounts of inventory at all our showrooms at all times. Our operations may be subject to incidents of theft or damage to inventory in transit, prior to stocking or during showroom stocking and display. Although we have set up various security measures, including tagging our products, CCTV in showrooms, armed security guards and follow stringent operational processes such as a routine for stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

12. *Our insurance may be insufficient to cover all losses associated with our business operations.*

Our insurance policies currently cover insurance of the stock at the premises of our showrooms and vehicles used for business purpose. Notwithstanding the insurance coverage that we carry, we may not be fully insured against abnormal business risks.

Following is the summary of the insurance policies of our Company:

There are many events that could significantly impact operations, or expose us to third-party liabilities, for which we may not be adequately insured. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, financial condition and results of operations could be adversely affected. For details, please see “Our Business - Insurance” on page 118.

13. Our offices and showrooms are located only in Ahmedabad, Gujarat, India. Any adverse development affecting such region may have an adverse effect on our business, prospects, financial condition, and results of operations.

Our offices and showrooms are located only in Ahmedabad, Gujarat, India. Our business is highly vulnerable to regional conditions and economic downturns in the region. Any unforeseen events or circumstances that negatively affect this area could materially adversely affect our sales and profitability. These factors include, among other things, changes in demographics, population and income levels. In addition, our business may also

be susceptible to regional natural disasters and other catastrophes, such as fires, riots, political unrest or terrorist attacks.

Any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the local governments in this region could adversely affect operations at our offices and the showrooms. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods, droughts, or diseases heightened or particular to the region, may adversely impact the supply of raw material to our vendors and/or job workers, end-products, local transportation and operations at our offices and showrooms. Such disruptions to supply would materially and adversely affect our business, profitability and reputation.

14. *We face significant competition in the Indian jewellery market, we risk losing substantial portion of our customers and our market share which will adversely affect our business, financial condition, results of operations and prospects.*

Competition in the retail Indian jewellery industry is significant. We operate in highly competitive and fragmented markets, and competition in these markets is based primarily on market trends, pricing and customer preferences. The players in the retail jewellery sector in India often offer their products at highly competitive prices and many of them are well established in their local markets.

Some of our competitors may be larger than us in terms of business volume and may have greater capital, technical capabilities and financial and other resources than us which may enable them to secure opportunities at lower prices or to otherwise incentivize the buyers. In addition, our competitors that are less specialized entities may compete effectively against us in a particular region based on price, size and established regional trust with the local customers.

Our larger competitors may provide promotional offers to customers, particularly during festivals, which we may not be able to compete with and which, accordingly, could result in, amongst other things, loss of our customers or failure to attract new customers, which could have a material adverse effect on our business, financial condition, results of operations and prospects. Our principal competitive factors include brand name, product style, product range, quality, display, price transparency, personalized service to our customers, showroom location, designs suited to local preferences, advertising and promotion. We cannot give any assurances that we will be able to compete successfully on all of these factors against existing or future competitors in the future.

Customer acquisition and retention remain key focus areas for us. We compete for customers, based on various factors, including design of our jewellery, pricing, quality of our jewellery and after sales service. If we do not compete in these areas effectively, this could lead to a decrease in our market share, experience downward pressure on prices and an increase in our marketing and other expenses. This could adversely affect our profitability, as it would cause us to experience lower revenue and additional selling costs to replace customers and recapture the lost revenue. Aggressive discounting by competitors on e-commerce platforms and at other brick and mortar stores may force us to reduce our prices in order to remain competitive and grow, which may thereby adversely impact our results of operations. The pricing of gold jewellery in particular is extremely competitive due to its objectively verifiable value, resulting in us having limited control over pricing of gold jewellery. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition, results of operations and prospects.

Further, the jewellery retailing industry in India has traditionally been dominated by family-owned standalone showrooms, which operated largely on trust. A significant portion of such jewellery retailers in the unorganised sector operate through partnerships/ proprietary concerns, as compared to our Company, which is regulated by the provisions of the Companies Act. Such corporate structures may offer our competitors in the unorganized sector more flexibility, particularly in terms of access to capital, amongst other things. We cannot assure you that we will be able to compete with the unorganized sector effectively, which could adversely affect our business, results of operations, financial conditions and prospects.

15. *We may not be able to protect our trademark from infringement.*

We have  brand name and logo as registered trademark in India. Although we take steps to monitor the possible infringement or misuse of our trademark, it is possible that third parties may infringe, dilute or otherwise violate our trademark rights. Any unauthorized use of our trademark could harm our reputation

or commercial interests. In addition, our enforcement against third-party infringers or violators may be unduly expensive and time-consuming, and any remedy obtained may constitute insufficient redress relative to the damages we may suffer. For details, see “Government and Other Approvals” on page 204.

-  **16. The trademark of  was registered under the name of the Promoter and Director Mrs. Jyoti Kabra and was subsequently transferred through an assignment deed.**

 The trademark of  originally registered under the name of Promoter and Director Mrs. Jyoti Kabra, was later assigned to our Company through a deed of assignment. However, this deed could be revoked by the Promoter, potentially resulting in the loss of our brand and customers. Such a scenario could adversely impact our business, operational results, and financial condition.

- 17. In the past, there have been discrepancies in filings with the Registrar of Companies (RoC) and other non-compliances under the Companies Act, which may result in penalties. Further, we have filed a compounding application with the MCA for such non-compliance.**

There was a non-compliance reported by the practicing Company Secretary in their search report dated September 11, 2024 for the financial year 2022-23. These include the violation of provision under Section 134(3)(o) of the Companies Act, 2013. Certain forms were also filed late with the Registrar of Companies, which we have since rectified by filing and paying the additional fees. On September 9, 2024, Our Company filed a suo moto compounding application with the MCA pursuant to Section 441 of the Companies Act, 2013 for compounding of violation of provision under Section 134(3)(o) of the Companies Act, 2013.

There can be no assurance that MCA will compound this offence in a timely manner or at all. In the event that we are subject to any penalties or other regulatory actions in relation to the abovementioned compounding application, our reputation, business and results of operations could be adversely affected. Further, we cannot assure you that such lapses will not occur in the future and that we will not be subject to further penalties or other regulatory action.

- 18. We do not register our jewellery designs under the Designs Act, 2000 and we may lose income if our designs are duplicated by competitors.**

As our industry is fashion oriented, there is a constant need for innovation and trend setting. Jewellery designs change on a frequent basis and therefore we do not register the designs used by us, under the Designs Act, 2000.

A major criterion of our product differentiation from other jewellery products is the designs we use in our jewellery products. These designs are made and finalized by a combination of our in-house designers and the manufacturer/ job workers. Since these designs are not registered under the Designs Act, 2000, we face the risk of our designs being copied, partially or entirely, by our competitors, resulting in us losing one of our important strengths. In the absence of registration under the Designs Act, 2000, we cannot protect our designs by invoking any law on our competitors for duplicating our designs, resulting in a loss of income, thus affecting our results of operation and financial condition. Further, we believe that efforts to protect our intellectual property may not be adequate and we may not be able to detect unauthorized use or take appropriate and timely steps to enforce intellectual property rights either owned by us or those that we have right to use. We may also be subject to litigation by our competitor or other industry players for copying their designs and in absence registration of our designs, we may not be able to protect or defend our case.

We may inadvertently develop a design already registered by a third party, which may require us to either stop the manufacture & sale of such jewellery or be a part of lengthy litigation to defend the same. In both scenarios, we may be subject to losses due to legal costs, stay on sale of certain products and / or both. Further, if any litigation is proved against us, we may be subject to penalty and / or compensation which may adversely affect our cash flows. While we take care to ensure that we comply with the intellectual property rights of third parties and that there are no pending claims against us for infringement of third party intellectual property rights, we cannot determine with certainty whether we are infringing upon any existing third-party intellectual property rights. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. As a result of such infringement claims, we

could be required to pay third party infringement claims, alter our technologies, change the brands under which we distribute our products, obtain licenses or cease some portions of our operations. The occurrence of any of the foregoing could result in unexpected expenses and thus adversely affect our financial condition.

19. We have entered into, and will continue to enter into related party transactions. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our business, financial condition, cash flows and results of operations.

We have entered into various related party transactions, with our directors and group companies, during the Financial Year 2023-24. While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is possible that we may enter into related party transactions in the future. We cannot assure you that such future transactions, individually or in the aggregate, will not have an adverse effect on our business, financial condition, cash flows and results of operations or that we could not have achieved more favourable terms if such future transactions had not been entered into with related parties. We cannot assure you that our Directors and officers will be able to address such conflicts of interests or others in the future.

20. We have availed unsecured loans from Promoters and third parties that are recallable, at any time.

As on March 31, 2024, we have unsecured loans amounting to ₹ 2,827.41 lakhs from promoters and third parties which are repayable on demand. Further, these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the Company. Our Company has availed cash credit facilities from Banks are repayable at demand. For further details of unsecured loans of our Company, please see "Statement of Financial Indebtedness" on page 181.

21. We have experienced negative cash flows in the past, and we may have negative cash flows in the future.

Our Company had reported certain negative cash flows in previous years as per the Restated Financial Information, as stated below:

Particulars	(Rs. In Lakhs)		
	For the year ended March 31		
	2024	2023	2022
Net Cash generated from/ (used in) Operating Activities	1,581.04	(1,243.81)	221.14
Net Cash generated from/ (used in) Investing Activities	(239.07)	(282.37)	(696.84)
Net Cash generated from/ (used in) Financing Activities	(1,202.32)	1,538.64	457.38

Our net cash flows from operating activities for the financial year 2023 have been negative, primarily due to start of operations in new showrooms established by the company. As a result inventory of the company has increased by Rs. 3,994.54 lakhs as compared to Restated Financial Year ended 2021-22.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Since our Company is in a growth phase, our working capital requirement has increased in tandem and this has resulted in negative cash flow from operations in the Financial Years ended March 31, 2024, 2023 and 2022. We may continue to have negative operating cash flows in future. If our Company is not able to generate sufficient operating cash flows, it may adversely affect our business and financial operations. For further details, see "Restated Financial Statements" on page 151.

22. We could face customer complaints or negative publicity about our customer service.

Customer complaints or negative publicity about our customer service could diminish consumer confidence in, and the attractiveness of, our Company and brand. We interact with customers across all of our showrooms and consistently strive to maintain high standards of customer service. However, we periodically have experienced customer disputes and receive complaints, which we endeavor to resolve through prompt and effective customer service. Any inability by us to properly manage or train our sales staff, and managerial personnel who handle customer complaints and disputes could compromise our ability to handle customer complaints effectively in the future. If we do not handle customer complaints effectively, our reputation may suffer, and we may lose our

customers' confidence, which could have a material adverse effect on our business, financial condition and results of operations.

23. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

For our business operations, our results of operations are dependent on our ability to effectively manage our inventory. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of merchandise or an accumulation of excess inventory. Further, if we fail to sell the inventory, we may be required to recycle our inventory, which would have an adverse impact on our income and cash flows.

Our management system ensures a smooth movement of inventory based on the demand, customer preference and orders. Our inventory management systems are well equipped and follows a very systematic and efficient method to determine a real-time visibility into our inventory, thus providing our management with useful inputs and suggestions to handle the inventory and its movement during peak times such as wedding seasons and specific festival times such as Dhanteras, Akshaya Trithiya, Dussehra and Diwali.

24. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Statement of Financial Indebtedness*” on page 181 of this Draft Red Herring Prospectus.

25. *The strength of our brands is crucial to our growth and success and we may not succeed in continuing to maintain and develop our brands.*

Our business and results of operations are influenced by the strength and popularity of our brand called “KK Jewels”, including the level of consumer recognition and perception of our brands in the mind of varied customers. We believe that in the business of jewellery the value and the trust of a brand plays a very important role in the overall growth of the business and its result of operations. The strength of our brands depends on factors such as our growth, our product designs, the materials used to make our products, the quality of our products, the designs, the distinct character and presentation of our products as well as the presentation and layout of our showrooms. Public communication activities such as advertising, public relations, promotions, offers and marketing as well as the general perception of our business also impact our brands. Failure to manage any of the above factors or failure of our promotional and allied activities to differentiate and further strengthen our brands could adversely affect the value and perception of our brands and our ability to maintain existing customers and attract new customers, and, as a result, have a material adverse effect on our business, results of operations and financial condition. The sales promotion and advertisement expenses for the period ended for FY 2024, FY 2023 and FY 2022 are Rs. 105.48 Lakh, Rs. 119.29 Lakh and Rs. 49.55 Lakh respectively.

We may face negative brand publicity and brand dilution to the extent we fail to develop, promote and position our brands effectively and consistently in the competitive market, with respect to new products, current products, various range of offerings or any new product categories. However, there can be no assurance that our advertising or marketing efforts are or will be successful at all times and may result in increased sales. Furthermore, there can be no assurance that our marketing efforts will succeed in maintaining our brand and its perception with customers.

26. If we fail to convert existing customers into repeat customers or to acquire new customers, our business, financial condition, and results of operations would be harmed.

Our business continuity and profitability is dependent on ensuring that our existing customers base is converted to repeat customers and simultaneously we continue to add new customers to our customer base which majorly consists of individuals. This is mainly dependent on our product offerings, brand value, goodwill, quality of products, price point, promotions, marketing, word of mouth and various other factors. It is imperative for our business to ensure that we have repeat customers and also that we reach out to new customers. We cannot ensure that steps taken by us for our business and the brand will attract repeat customers or new customers. Our failure to achieve this will have an impact on our business, profitability and results of operations.

27. Change in technology may affect our business and financial condition.

We outsource the manufacturing work of our jewellery products to third parties on job work basis. Change in industry requirements or competitive technologies may render the existing technologies of our vendors or job workers obsolete. The ability of vendors or job workers to adhere to technological changes and standards successfully and on timely basis will play a significant factor in our ability to grow and to remain competitive. We, however, cannot assure you that our existing vendors and job workers will be able to adhere to such technological changes on timely basis and that we will be able to do business with new vendors and job workers who has adopted updated technology. We are also subject to risks generally associated with the introduction of new products and their applications, including lack of market acceptance, delay in product development and failure of products to operate properly. Our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

28. Any failure of or disruption to our information technology systems could adversely impact our business and operations.

We rely on our information technology ("IT"), systems to provide us with connectivity across our business functions and showrooms through our software, hardware and network systems. Our business processes are IT - enabled. Our jewellery is typically tracked by radio-frequency identification tags tracking system that uses smart barcodes in order to identify jewellery items.

We utilise computer systems in each of our showrooms to track and monitor each piece of inventory, which are further linked to our RFID Tag. Any failure in our IT systems or loss of connectivity or any loss of data arising from such failure could disrupt our ability to track, record and analyze inventory, process financial information, manage creditors/debtors or engage in normal business activities, which could have a material adverse effect on our operations. Although we have not experienced any material failure in our IT systems, there can be no assurance that our IT systems will not suffer a material failure in the future. We are also susceptible to potential hacking or other breaches of our IT systems. As a result, failure to protect against technological disruptions of our operations could materially and adversely affect our business, financial condition and results of operations. We also maintain significant amounts of customer data that we collect in order to promote our brand and direct targeted advertisements to potential customers. Any breach of our IT systems or misuse by employees could result in the loss or disclosure of confidential information, damage to our reputation, litigation or other liabilities.

Furthermore, we individually tag each item that is sold at our showrooms, which enables us to track, record and analyze sales of our products to customers across all of our showrooms. Any delay or disruption in our IT systems, could have a material adverse effect on our business, financial condition and results of operations. Further, any failure, disruption or manipulation of our tagging system could disrupt our ability to track, record and analyze sales of our products, which could have a material adverse effect on our business.

We also have a website, <https://kkjewels.org/>. Many of our control systems are dependent on third party software and technology. Our website and third-party software may be subject to damage, software errors, computer viruses, security breaches and the delayed or failed implementation of new updates. Damage or interruption to our third-party and other control systems may require a significant investment to fix or replace them, and we may suffer interruptions in our operations as a result.

29. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Key managerial personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “*Our Management*” on page 134 of this Draft Red Herring Prospectus.

30. *We may not be successful in implementing our business strategies.*

The success of our business will depend greatly on our ability to effectively implement our growth strategies. For further details on our strategies, see “*Our Business — Our Strategies*” on page 115. There can be no assurance that we will be able to successfully execute our strategies, which may adversely affect our business, financial condition, cash flows and results of operations.

We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and strategies could have an adverse effect on our business, financial condition, cash flows and profitability.

31. *Our culture and values have been critical to our success and if we cannot maintain this culture and our values as we grow, our business and reputation could be adversely affected.*

We believe that our culture and values have been critical to our success. We may face a number of challenges that may affect our ability to sustain our corporate culture and values, including a potential failure to attract and retain employees who embrace and further our culture and values, any expansion into additional markets and competitive pressures that may divert us from our priorities, vision and integration of new personnel.

While we aim to build a fair, admired, compliant and performing culture with regular education and training to employees, including zero tolerance of any violations around our code of conduct (including on the prevention of sexual harassment), there could be violations which could affect our reputation and impact our cultural fabric. Any unethical or illegal employee actions and behaviour may harm our reputation and possibly expose us to sanctions or penalties. Employee misconduct, fraud or error could harm us by impairing our ability to attract and retain consumers and we may be subject to significant legal liability and reputational harm. If we are not able to maintain our culture and values as we continue to grow, our business, financial condition, cash flows and results of operations could be adversely affected.

32. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, there can be no assurance that the relevant authority will issue or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “*Government and Other Approvals*” on page 204 of this Draft Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

33. *Our Promoters will continue to retain significant shareholding in us after this Offer, which will allow them to exercise significant influence over us and any substantial change in our Promoters' shareholding may have an impact on the trading price of our Equity Shares which could have an adverse effect on our business, financial condition, results of operations and cash flows.*

Following the completion of the Offer, our Promoters will continue to hold a significant percentage of our Equity Share capital. Our Promoters will, therefore, be able to control the outcome of matters submitted to our Board or Shareholders for approval. After the Issue, our Promoters will continue to exercise significant control or influence over our business and major policy decisions. The trading price of our Equity Shares could be adversely affected if potential new investors are disinclined to invest in us because they perceive disadvantages to a large shareholding being concentrated in our Promoter.

As at the date of this Draft Red Herring Prospectus, our Promoters together hold 54,40,000 Equity Shares, or 73.91 % of our issued, subscribed and paid-up Equity Share capital on a fully diluted basis. Upon completion of the Offer, our Promoter will hold [●] % of our Equity Share capital. For details of our Equity Shares held by our Promoters, see “*Capital Structure — Notes to the Capital Structure — History of the equity share capital held by our Promoters*” on page 60.

Accordingly, our Promoters will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of our Board of Directors, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters as our controlling shareholders could conflict with our interests or the interests of our other shareholders.

34. *The average cost of acquisition of Equity Shares by our Promoters, could be lower than the issue price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please see “*Capital Structure*” on page 60 of this Draft Red Herring Prospectus.

35. *Our Promoters, Directors and Key Management Personnel may have interests other than reimbursement of expenses incurred and receipt of remuneration or benefits from our Company. Certain of our Promoters and Directors may have interest in entities, which are in businesses similar to ours and this may result in conflict of interest with us.*

Certain of our Promoters, Directors and Key Management Personnel are interested in us, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding, direct and indirect, and our stock options and benefits arising therefrom. Our Promoters are also interested in us to the extent of their shareholding in us and any benefits arising therefrom. Further, certain of our Promoters and Directors may have interest in entities to the extent of their shareholding and/or directorships, which are in businesses similar to ours and this may result in conflict of interest with us.

36. *Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in retail business of jewellery which attracts tax liability such as Goods and Service Tax, Income Tax, and Professional Tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund and ESI. However, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

37. *There is no monitoring agency appointed by our Company and deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2016 appointment of monitoring agency is required only for Issue size above Rs. 100 Crores. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the National Stock Exchange of India Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

Further, we propose to utilize the Net Proceeds for purposes identified in the section titled “*Objects of the Issue*” on page 71 of the DRHP. The manner of deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

38. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled “*Objects of the Issue*” is to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

39. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

EXTERNAL RISK FACTORS

40. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

41. *Our business could be affected and disrupted by other kinds of catastrophic occurrences and similar events.*

Natural disasters (such as cyclones, flooding and earthquakes), epidemics, pandemics, acts of war, civil unrest, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn adversely affect our business, financial condition, cash flow and results of operations.

Our operations may be adversely affected by fires, floods, natural disasters and severe weather, which can result in damage to our property or inventory or that of our consumers and suppliers, and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus.

42. All of our business and operations are located in India and as such, we are subject to regulatory, economic, social and political uncertainties in India, many of which are beyond our control.

All of our business and our personnel are located in India, and we intend to continue to develop and expand our business within India. Consequently, our financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Our business results depend on a number of general macroeconomic and demographic factors in India which are beyond our control. In particular, our revenue and profitability are strongly correlated to consumer discretionary spending, which is influenced by general economic conditions, unemployment levels, the availability of discretionary income and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased unemployment, increased energy prices, rising interest rates or other industry-wide cost pressures could also affect consumer behavior and spending for beauty and fashion products and lead to a decline in our sales and earnings. Political instability could also delay the reform of the Indian economy and could have an adverse effect on the market. Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, financial condition, cash flows, results of operations and prospects. Anti-import sentiments amongst the population and a rapidly evolving consumer demographic may also have grave impact on our revenue and results of operations.

Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- epidemic, pandemic (including the COVID-19 pandemic) or any other public health in India or in countries in the region or globally, including in India's various neighbouring and key trading countries;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

43. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms

at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

44. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

45. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

46. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

RISKS RELATED TO THE ISSUE

47. *Industry information included in this Draft Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with

the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this DRHP.

48. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.*

We intend to utilise the Net Proceeds of the issue as set forth in “*Objects of the issue*” beginning on page 71. The funding requirements mentioned as a part of the objects of the issue are based on internal management estimates in view of past expenditures, and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial conditions or business strategies.

Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, our organic growth and expansion plans could be delayed due to failure to receive regulatory approvals, technical difficulties, human resource, technological or other resource constraints, or for other unforeseen reasons, events or circumstances. We may also use funds for future businesses which may have risks significantly different from what we currently face or may expect. Further, we may not be able to attract personnel with sufficient skills or sufficiently train our personnel to manage our expansion plans.

Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

49. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 12.5%, in excess of Rs. 1,25,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

50. *The determination of the Price Band is based on various factors and assumptions and the issue price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Further, the current market price of some securities listed pursuant to certain previous issues managed by the Lead Managers is below their respective issue prices.*

The determination of the Price Band is based on various factors and assumptions, and will be determined by us in consultation with the Selling Shareholders Committee and the Lead Managers. Furthermore, the issue price of the Equity Shares will be determined by us in consultation with the Lead Managers through the Book Building Process. These will be based on numerous factors, including factors as described under “*Basis for Issue Price*” beginning on page 79 and may not be indicative of the market price for the Equity Shares after the Offer.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the Lead Managers is below their respective issue price. For further details, see “*Other Regulatory and Statutory Disclosures* on page 210. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, our financial performance and results post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

51. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated by the virtue of being a listed company. As a listed company,

we will incur considerable legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges on which equity shares of our Company will be listed, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily.

52. *If inflation rises in India, increased costs may result in a decline in profits.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

53. *We cannot assure you that our equity shares will be listed on the NSE EMERGE in a timely manner or at all, which may restrict your ability to dispose of the equity shares.*

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Red Herring Prospectus listed on NSE EMERGE platform in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the EMERGE Platform of National Stock Exchange of India Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the Company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

54. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

After listing permission and trading permission of equity shares have been granted, the price of the shares shall be driven by free market forces. The market price of a company's share is determined by the forces of supply and demand in the stock market. These forces are influenced by a variety of factors, including the company's financial performance, industry trends, economic conditions, and investor sentiment.

When a company issues equity shares, it sets an issue price based on various factors such as the company's valuation, the prevailing market conditions, and the demand for its shares. However, the issue price is not necessarily indicative of the market price of the shares after the issue.

Once the shares are listed on the stock exchange, their price is determined by the forces of supply and demand in the market. If there is strong demand for the shares, the price may rise above the issue price, and if there is weak demand, the price may fall below the issue price.

Therefore, while the issue price of equity shares provides a starting point for the company's valuation, it is not necessarily a reliable indicator of the market price of the shares after the issue. Investors should carefully evaluate all relevant factors and information before making investment decisions in the stock market.

55. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Following the Issue, we will be subject to a daily "circuit breaker" imposed by the Stock Exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

56. *The issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the issue Price.*

The issue Price of our Equity Shares has been determined by the Book Built method. This price is being based on numerous factors (For further information, please see the section “*Basis for Issue Price*” on page 79 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participant's verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims.

Justification:

Inventories	Our Company's finished goods primarily consist of jewellery made of gold, diamond, silver and other precious and semi-precious stones. Finished goods inventory days are computed from the historic restated Financial Information. Historically they have ranged from 172 to 256 days. They have been assumed to be 217 days and 179 days for fiscal 2025 and 2026 respectively on the basis of the growth plans of the Company.
--------------------	---

	In the Fiscal 2023 and 2024 due to opening of new showrooms the inventory level had increased however, with the new showrooms have started functioning smoothly the Company will rotate the jewellery among different showrooms in an effort to increase inventory turnover and make minimal accumulation of slow-moving stock at showroom locations driven by data analysis and report generation to the reduce inventory level to 217 days and 179 days for fiscal 2025 and 2026.
Trade Receivable	<p>The company has maintained holding level for trade receivable. The Holding levels of the trade receivable were 4 days in Fiscal 2022, 9 days in Fiscal 2023 and 14 days in Fiscal 2024. We have been able to maintain the trade receivables around normalcy during the previous three Fiscals. With increase in prices of jewellery, going forward the company expects to maintain trade receivables at around 25 days in order to achieve its growth targets.</p> <p>With increase in price of gold and other precious stones, overall value of jewellery has gone up. By giving higher credit to our trustworthy customers, the company will be able to increase sales. Also, the company will make effort to start higher B2B sales with better branding.</p>
Trade Payables	<p>Holding levels for trade payables are computed from the historic restated financial information and has ranged between 25 to 37 days. In the past our holding levels of trade payables has decreased from 50 days in Fiscal year 2023 to 23 days in Fiscal year 2024. With increase in prices of precious metal, gems and other stones, suppliers are expecting prompt payment. In order to maintain regular supply at good rates, we plan to use the incremental finance available to get better rates for our purchases and accordingly the creditor days are expected to reduce and have been estimated to be 19 days for fiscal 2025.</p> <p>With increase in internal accruals, the company will make prompt payment to their suppliers in order to get better prices. This in turn will lead to increase in overall margins.</p>

Note:

1. Holding period level (in days) of Inventories is calculated by dividing inventories by revenue from operations multiplied by number of days in the year (365).
2. Holding period level (in days) of Trade Receivables is calculated by dividing trade receivables by revenue from operations multiplied by number of days in the year (365).
3. Holding period level (in days) of Trade Payables is calculated by dividing trade payables by raw material consumption multiplied by number of days in the year (365).

The reasons for increase in future working capital requirements of our company are as under:

- Our business operations are working capital intensive. We plan to grow this segment by introducing these pieces in retail showrooms, aiming to expand our customer base, increase revenue, and improve margins. GLOBAL ECONOMIC OVERVIEW

Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in 2023 and 2024 on an annual average basis. Compared with projections in the April 2023 World Economic Outlook, growth has been upgraded by 0.2 percentage point for 2023 with no change for 2024. The forecast for 2023-2024 remains well below the historical (2000-19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced Economies continue to drive the decline in growth from 2022-2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. Global headline inflation is set to fall from an annual average of 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024, broadly as projected in April, but above pre-pandemic (2017–19) levels of about 3.5 percent. About three-quarters of the world’s economies are expected to see lower annual average headline inflation in 2023. The forecast for 2023 is revised down by 0.2 percentage point, largely on account of subdued inflation in China. The forecast for 2024 has been revised upward by 0.3 percentage point, with the upgrade reflecting higher-than-expected core inflation. The balance of risks to global growth remains tilted downward, but adverse risks have receded since the publication of the April 2023 Outlook WEO. The resolution of US debt ceiling tensions has reduced the risk of disruptive rises in interest rates for sovereign debt, which would have increased pressure on countries already struggling with increased borrowing costs. The quick and strong action authorities took to contain banking sector turbulence in the United States and Switzerland succeeded in reducing the risk of an immediate and broader crisis. In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

INDIAN ECONOMY OVERVIEW

Aggravating the slower growth in global trade in 2023. Exporting one's way to growth will not be easy. This reinforces the need to lower logistics costs and invest in product quality to hold on to and expand market share in areas where India has an advantage. Closely related to this challenge is the advent of Artificial Intelligence with the profound and troubling questions it poses for growth in services trade and employment since technology might remove the advantage of cost competitiveness that countries exporting digital services enjoy. Third and arguably the most important is the energy transition challenge. Concerns over rising temperatures have led to a single-minded focus on reducing carbon emissions amidst the determination that the emission of greenhouse gases, particularly carbon, is the most significant causal factor. This has led to persistent demands from international organisations and advanced nations on developing nations to wean themselves off fossil fuels and switch to greener energy even as technological and resource obstacles remain and are not on offer from developed countries. It is a reality that, in the short run, there is a trade-off between economic growth and energy transition. In a growth-challenged post-Covid global economy, countries can ill afford to sacrifice the former for the latter. India is walking the fine line between the two more skilfully than other nations, with installed non-fossil fuel-based power generation capacity running ahead of targets. Importantly, India's unwavering commitment to ensuring steady economic growth is generating resources for investment needed for climate change adaptation, building resilience, and mitigating emissions. The Indian economy is better placed than ever to take on these three key challenges because of the policies adopted and implemented in the last decade. The Union government has built infrastructure at a historically unprecedented rate, and it has taken the overall public sector capital investment from ₹5.6 lakh crore in FY15 to ₹18.6 lakh crore in FY24, as per budget estimates. That is a rise of 3.3X. Whether the total length of highways, freight corridors, number of airports, metro rail networks or the trans-sea link, the ramp-up of physical and digital infrastructure in the last ten years is real, tangible and transformative. The financial sector is healthy. Its balance sheet is stronger. It is willing to lend and is lending. Non-food credit growth, excluding personal loans, is growing at double-digit rates. The pursuit of inclusive development finds Indian households in good financial health. Fifty-one crore bank accounts under Jan Dhan Yojana now have total deposits of over ₹2.1 lakh crore.

Over 55 per cent of them are women. In Dec. 2019, household financial assets were 86.2 per cent of GDP; liabilities were 33.4 per cent of GDP. In March 2023, these numbers were 103.1 per cent and 37.6 per cent, respectively. So, Net Financial Assets of households were 52.8 per cent of GDP in Dec. 2019, and by March 2023, it had improved to 65.5 per cent of GDP. Preface iii The economy has created jobs; the unemployment rate has declined considerably from the peaks during Covid times. The labour force participation rate has increased, especially that of women. Net new subscribers to the Employee Provident Fund (EPF) have steadily risen post

Covid, especially among the younger population. Women are also enrolling more than ever in tertiary education. The Eleventh Edition of the CII-Wheelbox India Skills Report based on the National Employability Test conducted by Wheelbox2 shows India's youth employability at 51.3 per cent, up from 33 per cent a decade ago. Institutional births are widely prevalent, and the infant mortality rate has declined, as has stunting. More remains to be done, however. In 2014, the economy was beset with high fiscal and current account deficits and double-digit inflation. Now, inflation is under control, the fiscal deficit is trending lower, the current account deficit is just above one per cent of GDP, and foreign exchange reserves cover nearly eleven months of imports. It has been a journey from fragility to stability and strength. Two things must be singled out here. The government's COVID management and the vaccination record have been instrumental in the quick recovery staged by the economy.

3. Demonetisation

- The demonetisation move is encouraging people to use plastic money and debit/ credit cards for buying jewellery. This is good for the industry in the long run and will create more transparency.

- The Government would notify a new limit for reporting about transactions in gold and other precious metals and stones to authorities to avoid the parking of black money in bullion.

4. Gold spot exchange

- The government's announcement on establishing gold spot exchange could help in India's participation in determining gold price in the international market.

5. BIS Hallmarking Scheme

- The gold jewellery hallmark will now carry a BIS mark, purity in carat and fitness as well as the unit's identification and the jeweller's identification mark. The move is aimed at ensuring a quality check on gold jewellery.
- The Government made hallmarking mandatory for Gold Jewellery and Artefacts. A period of one year is provided for implementation, i.e. until January 2021.
- In August 2020, the Indian government launched an online registration and renewal system for 'Jewellers & Hallmarking' centres. This online system can be accessed via BIS web portal (www.manakonline.in)

6. Gold Monetisation Scheme

- The Gold Monetisation Scheme was launched in November 2015. This scheme enabled individuals, trusts and mutual funds to deposit gold with banks and earn interest on the same in return.
- As of January 2019, the Reserve Bank of India (RBI) increased the scope of the gold-monetization scheme by allowing charitable institutions and Government entities to deposit gold to boost deposits over the coming months.

7. Mandatory hallmarking regime

- In December 2020, All India Gem and Jewellery Domestic Council (GJC) welcomed the decision to make hallmarking compulsory from June 2021 in a phased manner; urged the government to examine the key concerns of the industry for smooth implementation of the initiative.
- Hallmarking of gold jewellery is set to begin from June 15, 2021. In view of the COVID-19 pandemic, the government accepted request of stakeholders to provide jewellers some more time to prepare for implementation and resolve issues. Earlier, the date of implementation was June 01, 2021.

8. Prevention of Money Laundering Act (PMLA)

- In December 2020, the Finance Ministry notified that the amendment under Prevention of Money Laundering Act (PMLA), notifying dealers in precious metals and stones, will maintain records of cash transactions worth US\$ 13.61 thousand (Rs. 10 lakh) or more cumulatively with a single customer.

9. Special Group

- In August 2020, the government called for constituting a special group, which will include both customs and banking officials, to resolve issues faced by the gem and jewellery sector.

10. EDI (Electronic Data Interchange) Connectivity of Postal Service with Customs in e-commerce Policy

- In December 2020, the Gem and Jewellery Export Promotion Council (GJEPC) urged the government to include in the

- Comprehensive e-commerce policy the EDI connection of postal services with customs, to enable banks to automatically close ecommerce exports against advance credit card payments by foreign purchasers.
- The step would drive for progressive reforms to help the industry fulfil its long-term goal of being the epicentre of global gems & jewellery.

11. Suspension of additional tariff on goods by the US

- In June 2021, the US suspended additional tariffs on six countries, including India, that have imposed or are considering equalisation levy/digital services tax on e-commerce companies for up to six months. This was done to provide additional time to complete the ongoing multilateral negotiations on international taxation at the Organisation for Economic Co-operation and Development (OECD) and G20.
- The suspension is likely to provide relief to the COVID-hit gems & jewellery sector in India.

Increasing FDI inflows into the sector

- The total foreign direct investment (FDI) inflows in the gems and jewellery sector during 2021-22 stood at US\$ 58.77 billion.
- The Government of India permitted 100% FDI in the sector through an automatic route.
- The US\$ 35.77 billion (Rs. 250,000 crore) big household jewellery industry is probably going to get a major lift through the government's decision for FDI in retail.

ROAD AHEAD

In the coming years, growth in the gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organized players provides variety in terms of products and designs. Online sales are expected to account for 1–2% of the fine jewellery segment by 2021–22. Also, the relaxation of restrictions on gold import is likely to provide a fillip to the industry.

The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. India has 450 organised jewellery manufacturers, importers & exporters and is the hub for jewellery manufacturing. These players have benefited greatly due to the increasing liberal policies by the government. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry. India's gems and jewellery industry is expected to reach US\$ 100 billion by 2027.

Our Unique Selling Points

➤ Designing

One of our strong pillars of growing our brand has been our constant innovation and approach towards offering unique designs. The designs for our jewellery are selected based on our market insights, study, customer research, recent preferences and trends and knowledge from the regions in which we operate. Our marketing team uses insights relating to customer preferences and trends that they gain through extensive market research, data analytics and customer feedback to develop a strategy and vision for new jewellery designs in line with these market trends and regional variations. We design our products based on customer needs and have established arrangements with various vendors and job workers who manufacture products on our behalf using our designs.

➤ Primary distinguishing feature – “Pagla Ceremony”

At KK Jewels Bridal Jewellery Store, we offer a unique service for clients who purchase our bridal jewellery. We host an auspicious event called the “Pagla Ceremony” for those who buy bridal jewellery from us. During this special ceremony, we invite the bride and the groom with their families to enjoy a one-hour program with delicious snacks and other offerings. We take the bride's footprint on a wooden pagla plate and later present it to her family as a token of good luck and prosperity. This emotional and auspicious ceremony has been highly appreciated by our clients, making us well-known in Ahmedabad for this exceptional effort. This event is the distinguishing factor for our brand and is a major unique selling point giving us a competitive advantage. The image of the Pagla Ceremony is shown below.

With over fifteen years of experience, supported by our Promoters extensive background in the jewellery industry, we have developed an effective business model. Our unique proposition lies in our complete control over the entire value chain.

On the demand side, we sell our products through six retail showrooms under the “KK Jewels” brand, located in Ahmedabad, directly serving end consumers in Gujarat. On the supply side, we have an in-house design process that is highly flexible and customizable. This robust process begins with thorough market research, followed by theme development, form layout creation, and meticulous crafting of each jewellery element to achieve the desired finish and designs. Our commitment to constant innovation and unique designs has been a key pillar in growing our brand. Additionally, we work with a network of skilled external artisans to meet specific customer requirements and acquire certain offerings for our silver jewellery retail showroom directly from other vendors on a trading basis.

Our company operates through a streamlined process where we collaborate closely with trusted vendors and job workers, with whom we maintain long-term relationships. Our job workers and vendors handle various stages of the manufacturing process, including procuring of raw materials, casting, polishing, and stone setting, while adhering to our stringent quality standards. This collaborative approach ensures efficient production, optimal cost management, and the consistent delivery of superior jewellery pieces to our customers.

Going forward, our strategy is to increasingly market our products to our millennial customers through digital media, social media platforms such as instagram. By creating visually stunning content and building a strong following on these platforms, we can increase brand awareness and generate interest in our products. mode with relatively lower investment which will increase our revenues. Our digital presence would boost our brand visibility and enhance our online exposure.

Enhancing Operating Effectiveness and Efficiency

Our Company aims to continue to improve our operational effectiveness and efficiencies to achieve cost reductions including overheads. We believe that this can be done through continuous business process review, improved inventory management and timely corrective measures in case of diversion and technology upgradation.

Quality Check

Quality is one of the most important aspects in our business. As our products are manufactured by our vendors or third party job workers, it is imperative that we implement quality check and control processes at each level of manufacturing and sales to ensure that the products we sell are of the best quality and in line with the required standards as prescribed by the regulatory authorities. After the hallmark process is completed by the recognised hallmarking agencies in accordance with the prescribed BIS norms, we also process the same through our internal quality control checks to ensure authentication. If a product does not match the prescribed quality standard, the same will be returned to the job worker/vendor for necessary alterations to ensure that it meets the due quality standards. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, amongst others equity shares. Pursuant to the SEBI UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the SEBI UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface

with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public offer closure to listing has been reduced from six Working Days to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

This Issue will be made under UPI Phase III of the UPI Circular.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/or payment instructions of the Retail Individual Bidders using the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor.

For further details, refer to the General Information Document available on the website of the Stock Exchange and the Book Running Lead Manager.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. Further, pursuant to SEBI circular no. Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
